6th July 2021

Jesse Benjamin
PCREE

Dear Mr. BENJAMIN,

**Letter Inviting you to Participate in the Panel Discussion and display during Energy
Day on 14th July 2021**

The Department of Energy (DoE) is organising an Energy Day on 14th July 2021, a day for celebration and a day for learning. This will be the first event of its kind with a purpose to do a nationwide awareness on the role of Energy Department within the Ministry of Climate Change. The theme of the event is “**Energy to power the new normal #Beyond40**”. This event will bring together stakeholders, suppliers and users of energy to showcase their products and services in the energy space and their contributions towards achieving ‘Energy for All’. Briefly, about the department, it has a policy document the ‘National Energy Road Map’ (NERM) 2016-2030 with established corporate strategies to achieve its targets. The five strategic areas of policy intervention include; Accessible energy, affordable energy, secure and reliable energy, sustainable energy, and green growth energy. Most of the efforts, activities and projects implemented by DoE are guided towards achieving the NERM targets.

The event will be held at the Convention Centre from 8 a.m to 3 p.m.

As part of Day’s activity, we are organising a panel discussion and we are kindly inviting you to be part of the panelists. The topic of the panel discussion will be around Renewable Energy Transformation in Vanuatu. Attached with this letter are the guiding questions for the panel discussion.

DoE would also appreciate if you are able to set up a display of your institution/company and the activities it has been involved in within the energy sector. It will be a good opportunity to also do awareness about what your institution/company to the general public who will be attending the event.

For any queries please do contact the Communications officer, Fern Napwatt directly on office phone 25201 or VOIP 3894 or email fnapwatt@vanuatu.gov.vu.

Yours Sincerely,

Mr. Antony Garae
Director, Department of Energy
